theScore

Case study

mopub

theScore chose MoPub to power direct ad serving on its award winning sports app. They spent less time trafficking, delivered more direct campaigns and increased remnant eCPM by 25%.

Challenge

Even the best sales teams are challenged to sell 100% of the inventory created by a global audience. theScore enjoys this exact challenge, having built a massive audience of passionate and engaged sports fans through its personalized user experience cultivated from its in-depth coverage of 15,000 players, 800 teams, and 20 leagues.

As an award winning premium property, direct sales to premium brands represents a significant component of their advertising opportunity. theScore needed a robust mobile ad server capable of delivering sophisticated brand campaigns, plus the ability to maximize the value of any impressions not sold to direct advertisers.

Results

Gained efficiencies while successfully delivering more direct campaigns

25% Gain in eCPM for remaining remnant inventory

About theScore
- Toronto, Canada
- Top 25 Sports - iOS
- Top 10 Sports - Android
- 50 Must-Have Apps for iPad - Time 2013
- Apple iTunes Hall of Fame - iTunes 2012
- Best Sports App - iTunes Rewind 2011

Goals
- Reduce time spent managing direct sold campaigns
- Increase overall eCPM earned from mobile
- Seamlessly deliver high value sponsorships and rich media items
- Improve Remnant performance banner inventory

Solution
- Integrated MoPub platform to manage direct sales and remnant in a single dashboard
- Aggressively using Line Item Priorities to deliver high dollar sponsorships
- Using MoPub Marketplace and server-to-server ad networks to maximize fill rate.

Solution

The MoPub team combined a comprehensive feature set and hands-on clients services to deliver against business objectives for theScore:

· Leverage customized ad unit creation to segment the app by sport and content features
· Use MoPub MRAID support to quickly and correctively traffic rich media creatives
· Aggressively use Line Item Priorities to deliver high dollar sponsorships
· Collaborate with MoPub Product and Client Services teams to scope and add high value features, such as depart targeting
· Use MoPub Marketplace and server-to-server ad networks to maximize fill rate

"The overall process of creating campaigns is definitely more intuitive, thanks to our partnership with MoPub."

- Victoria Blainey,, Sr. Manager Ad Operations, theScore

Key Results

The intuitive design of the MoPub UI created efficiencies for the ad operations workflow at theScore. The company is successfully delivering more direct campaigns while spending less time trafficking and reporting. Direct sales now accounts for 1/3 of inventory usage on the Score mobile apps, including sponsorships from top brands like Nike, Porsche, Corona and The Home Depot.

eCPM from the remaining inventory has increased by 25%, most notably by gains in fill rate from additional ad networks and dynamic impression optimization through real-time bidding.

The ongoing partnerships between theScore and MoPub are focused on defining additional high value features, such as the recent launch of daypart targeting.
